

Customer Portal – Online Grocery Store
Testable User Stories

User Story 1: Register Account

As a customer, I want to register for an account so that I can shop and place orders.

Test Case

Given the customer enters valid information, when they submit the registration form, then the system should create their account.

User Story 2: Login

As a customer, I want to log in so that I can access my cart and orders.

Test Case

Given the customer has an account, when they enter the correct email and password, then the system should log them in.

User Story 3: Browse/Search Products

As a customer, I want to browse and search products so that I can find items I want to buy.

Test Case

Given products exist in the catalog, when the customer searches or browses, then the system should show matching products with price and availability.

User Story 4: Manage Shopping Cart

As a customer, I want to add, remove, and update items in my cart so that I can choose what I want to buy.

Test Case

Given the customer has a product in their cart, when they change the quantity or remove it, then the cart should update correctly.

User Story 5: Apply Discount Code

As a customer, I want to use a discount code so that I can lower my order total.

Test Case

Given the customer enters a valid discount code, when they apply it, then the system should reduce the order total.

User Story 6: Place Order

As a customer, I want to place an order with my cart, address, and delivery option so that I can complete my purchase.

Test Case

Given the cart has items and the address is valid, when the customer places the order, then the system should create the order.

User Story 7: Track Order Status

As a customer, I want to track my order status so that I know if it is placed, paid, processing, shipped, delivered, or cancelled.

Test Case

Given an order has been placed, when payment is submitted and delivery updates happen, then the order status should update through the correct states.
